

Standard Operating Procedure (SOP) for Goods Receiving

This procedure ensures that all incoming goods are handled efficiently, accurately, and safely, adhering to the Quality Policy and preventing stock reconciliation errors.

1.0 Purpose

To establish a uniform and controlled process for the receipt, inspection, and recording of all incoming cargo and materials, ensuring compliance with client instructions and minimizing discrepancies.

2.0 Procedure Steps

Step	Action	Responsibility	Quality/Safety Check
2.1	Vehicle/Cargo Check-in	Gate Guard / Receiving Clerk	Verify the transporter's details against the expected Delivery Order (DO) or Advanced Shipping Notice (ASN). Check the vehicle for signs of tampering or damage before docking.
2.2	Unloading Preparation	Receiving Supervisor	Clear the staging area. Ensure all required Personal Protective Equipment (PPE) is worn by the unloading team (safety vest, hard hat, steel-toed boots).
2.3	Unloading and Tally	Warehouse Operator	Unload cargo carefully. Perform a preliminary count (tally) against the accompanying shipper's Bill of Lading (BOL) .
2.4	Initial Quality Inspection	Receiving Clerk	Mandatory Check: Inspect every pallet/carton for visible damage (crushing, wetness, torn seals). If damage is found,

			<i>document it immediately on the BOL and take photo evidence.</i>
2.5	WMS Receiving & Validation	<i>Receiving Clerk</i>	<i>Using the handheld scanner, scan the shipment reference/BOL number. Enter the verified quantity into the Warehouse Management System (WMS). The WMS generates a System Receiving Report.</i>
2.6	Discrepancy Resolution	<i>Receiving Supervisor</i>	<i>If there is a quantity mismatch or damage, the clerk must immediately notify the client or relevant internal department. No stock is put away until the discrepancy is acknowledged.</i>
2.7	Put-Away Location Assignment	<i>Warehouse Operator</i>	<i>Move the verified and received stock to its assigned bin or storage area (Ambient, Cold, or Temperature-Controlled). Scan the item and the storage location to confirm placement in the WMS.</i>
2.8	Document Filing	<i>Receiving Clerk</i>	<i>Attach the signed BOL, the System Receiving Report, and any Discrepancy Reports. File documents for record-keeping and reconciliation.</i>

3.0 Control Checklists (Receiving/Dispatch Checklist)

- *[] ASN/DO verified against physical shipment.*
- *[] Total Piece Count verified (Tally vs. BOL).*
- *[] Cargo inspected for damage (Pass/Fail).*
- *[] WMS entry completed and System Receiving Report generated.*
- *[] Discrepancy logged and resolution confirmed (if applicable).*
- *[] Final put-away scan confirmed in WMS.*
