

ADMIN

1. Login

#	Question	Yes	No
1	Can you successfully log in using your Google account?		
2	Does the system redirect you to the Google OAuth consent screen?		
3	After successful login, are you redirected to the dashboard?		
4	Is your profile information (name, email, picture) displayed correctly in the sidebar?		
5	Does the system remember your session when you refresh the page?		
6	Can you successfully log out using the logout button?		
7	After logging out, are you redirected back to the login page?		
8	Does the system prevent access to protected pages when not logged in?		

2. Manage Accounts

#	Question	Yes	No
1	Were you able to navigate the “Accounts” tab?		
2	Could you successfully “Onboard Accounts” (create new users)?		
3	Were you able to view “Activated Accounts”?		
4	From the activated accounts list, were you able to perform actions? (e.g., Deactivate account)		
5	Were you able to view “Deactivated Accounts”?		
6	From the deactivated accounts list, were you able to perform actions? (e.g., Reactivate account)		
7	Were you able to use the sort/filter function in Activated Accounts?		
8	Were you able to use the sort/filter function in Deactivated		

	Accounts?		
9	Were you able to search accounts by name and email in Activated Accounts?		
10	Were you able to search accounts by name and email in Deactivated Accounts?		
11	Were you able to deactivate accounts in the Actions column?		
12	Did the pagination functionality work correctly? (Pagination should trigger when the user list exceeds 10 entries, moving the 11th user to the next page.		

4. Audit Logs

4.1 Log Viewing

#	Question	Yes	No
1	Does the Audit Logs page display all system activities?		
2	Are log entries showing timestamp, user, action, and details?		
3	Is the most recent activity displayed at the top?		

4.2 Filtering & Search

#	Question	Yes	No
1	Can you search the audit logs by user or action?		
2	Can you filter logs by Action Type (Create/Update/Delete/View/Login/Logout)?		
3	Can you filter logs by Status (Success/Failed/Pending)?		
4	Can you filter logs by Date Range using date pickers?		
5	Do multiple filters work together correctly?		

4.3 Export Functionality

#	Question	Yes	No
1	Can you click the “Export” button?		
2	Does the system generate a PDF report of audit logs?		
3	Does the PDF include all filtered logs (if filters are applied)?		
4	Is the PDF formatted professionally with headers and timestamps?		

4.4 Pagination

#	Question	Yes	No
1	Does pagination work correctly (showing entries per page)?		
2	Can you navigate between pages smoothly?		
3	Does the page counter display correctly (e.g., “Page 1 of 5”)?		

5. Document Extraction

5.1 File Upload

#	Question	Yes	No
1	Can you click “Browse Files” to select a PDF document?		
2	Does the system accept only PDF files?		
3	Does the system reject non-PDF files with an appropriate error message?		
4	After selecting a file, is the file name and size displayed correctly?		
5	Can you clear the selected file and choose a different one?		
6	Can you click “Preview & Process” to proceed?		

5.2 PDF Preview

#	Question	Yes	No
1	Does the PDF preview render all pages correctly?		
2	Can you see page numbers on each page?		
3	Is the PDF displayed at a readable size?		
4	Does the layout accommodate multi-page PDFs without overlapping?		

5.3 PDF Parsing

#	Question	Yes	No
1	Can you click the “Parse PDF” button?		
2	Does the system show a loading indicator during processing?		
3	After parsing, is the content displayed in chunks?		
4	Are chunks showing metadata (Page, Type, Section)?		
5	Can you click on a chunk to highlight its location in the PDF and vice versa?		
6	Are highlight boxes displayed accurately on the PDF preview?		
7	Can you switch between the Markdown and JSON views?		

5.4 Content Editing

#	Question	Yes	No
1			
2			
3			
4			
5			
6			

7			
---	--	--	--

5.5 Knowledge Base Upload

#	Question	Yes	No
1	After parsing, does the “Uploading to Knowledge Base” button appear?		
2	Can you click the button to upload chunks to the knowledge base?		
3	Does the system show a loading indicator during upload?		
4	If a duplicate is detected, does a modal appear with existing document details?		
5	Does the duplicate modal show cost savings information?		
6	After a successful upload, does a success modal appear?		
7	Does the success modal show chunk count and filename?		
8	Can you view the processing history after successful upload?		

5.6 Processing History

#	Question	Yes	No
1	Can you open the processing history modal?		
2	Does the history show all previously processed documents?		
3	Are document details (filename, date, chunks, size, uploaded by) displayed correctly?		
4	Can you search for documents by filename or user?		
5	Can you sort documents by date, filename, chunks, or file size?		
6	Can you toggle between ascending and descending order?		
7	Does pagination work correctly? (10 entries per page)?		
8	Can you view the parsed content of a historical document?		

9	Can you delete a document from the knowledge base?		
10	Does the confirmation modal appear before deletion?		
11	After deletion, is the document removed from the history?		

5.7 Upload new PDF

#	Question	Yes	No
1	Can you click “Upload New PDF” to process another document?		
2	Does the system reset the preview and parsed content?		
3	Can you select and process a new PDF file?		

6. SFX Bot

6.1 Chat Interface

#	Question	Yes	No
1	Can you access the SFX bot page?		
2	Is the chat interface displayed with a message input box?		
3	Can you type a message in the input box?		
4	Can you send a message by clicking the send button or pressing enter?		
5	Does your message appear in the chat history immediately?		
6	Does the bot show a “thinking” indicator while processing?		

6.2 AI Responses

#	Question	Yes	No
1	Does the bot respond to your query within a reasonable time (< 10 seconds)?		

2			
3	Can you scroll through the chat history?		
4	Are user and bot messages visually distinct (different colors/alignments)?		

6.3 Document Context

#	Question	Yes	No
1	Can you ask questions about the uploaded documents?		
2	Does the bot retrieve relevant information from the knowledge base?		
3	Are source documents cited in the bot's responses?		
4	Are user and bot messages visually distinct (different colors/alignments)?		

7. SFX Assistant

7.1

#	Question	Yes	No
1	When I give a clear request, does the AI Assistant complete exactly what I asked?		
2	When I give a vague request, does it ask the right clarifying question before acting?		
3	When I provide wrong or incomplete details, does it detect the issue and guide me to fix it?		
4	When I ask a domain-specific question, is the answer accurate and relevant to our workflow?		
5	When I ask for a multi-step task, does it execute the steps in the correct order?		
6	When a tool or API fails, does it explain the problem clearly and		

	suggest a useful next step?		
7	When I ask it to perform a high-impact action, does it request confirmation first?		
8	When I ask a security-sensitive question, does it avoid exposing private or confidential data?		
9	When I continue the conversation, does it correctly remember earlier context?		
10	When I change my instruction mid-conversation, does it adapt without losing the new intent?		
11	When I ask for output formatting, does it follow the requested format correctly?		
12	When I ask the same question in different wording, does it give consistent results?		
13	When I ask for something it cannot do, does it clearly say the limitation without hallucinating?		
14	When the request is time-sensitive, is the response speed acceptable for real usage?		
15	When I test edge cases, does it remain stable and avoid broken behavior?		
16	When I ask for a summary of long content, does it keep key facts and avoid omissions?		
17	When I ask for step-by-step instructions, are the steps actionable and easy to follow?		
18	When different users test it, is behavior consistent with role and permission rules?		
19	When I review logs or traces, is there enough detail to audit what happened?		
20	After testing, would I trust this assistant to support real operations?
