

UAT Questionnaire - Updated

Document version: 2026-05-06 **Based on:** end-to-end trace of AA-lambda (supervisor + sub-agents), auth-lambda, kb-lambda, quota-lambda, and Frontend **Format:** Yes / No / N/A per question, grouped by feature area, split by user role.

This UAT questionnaire is split into three role sections:

- ADMIN** - full access (all dashboards, account management, audit logs, KB management, AI Assistant, SFX Bot, quota administration)
- MANAGER** - dashboard, AI Assistant, SFX Bot, analysis reports, profile, quota balance
- USER** - SFX Bot, analysis reports, dynamic mapping, profile, quota balance

Each role tests only the features that role can access in production. A handful of cross-role flows (login, logout, terms acceptance, profile, quota balance) are tested by every role.

ADMIN

1. Login & Authentication

1.1 Google Sign-In

#	Question	Yes	No
1	Can you successfully log in using your Google account?		
2	Does the system redirect you to the Google OAuth consent screen the first time you sign in?		
3	Are all required Google scopes requested on consent (Gmail, Drive, Docs, Sheets, Calendar)?		
4	After granting consent, are you redirected back to the application without errors?		
5	If you decline a scope, does the system handle it gracefully (clear error / re-prompt)?		
6	Is your access token + refresh token stored so you do not have to re-consent on every session?		
7	After a successful login, are you redirected to the Admin dashboard (/dashboard)?		

1.2 Terms of Service

#	Question	Yes	No
1	If you have not accepted the Terms yet, does a fullscreen Terms modal block the rest of the app?		
2	Is the "Accept & Continue" button disabled until you scroll to the bottom of the Terms?		
3	Once you scroll to the bottom, does the checkbox become enabled?		
4	Clicking "Accept & Continue" successfully records acceptance and unlocks the application?		
5	Clicking "Decline & Sign Out" logs you out and returns you to the login page?		
6	After accepting once, the Terms modal does NOT reappear on subsequent logins?		

1.3 Session, Token Refresh, Logout

#	Question	Yes	No
1	Does the system remember your session when you refresh the page?		
2	When your access token expires (~60 min), does the app silently refresh it without forcing re-login?		
3	Is your profile information (name, email, picture) displayed correctly in the sidebar?		
4	Is your role badge (<code>admin</code>) visible on the profile page?		
5	Can you successfully log out using the sidebar logout button?		
6	After logging out, are you redirected back to the login page?		
7	After logging out, does the system prevent access to protected pages by URL (e.g. typing <code>/accounts</code> redirects you to login)?		

2. Dashboard (`/dashboard`)

#	Question	Yes	No
1	Does the Dashboard load successfully after login?		
2	Is the welcome message + last-login timestamp visible?		
3	Are the stat cards rendered (note: values may currently be placeholder figures)?		

4	Is a Token Usage card visible with a usage bar (used / monthly limit)?		
5	Does the "Document Extraction" shortcut card navigate to <code>/document-extraction</code> ?		
6	Does the "Token Management" shortcut card navigate to <code>/quota</code> ?		
7	Does the "Task Approval" shortcut card navigate without a 404 (note: known issue - currently points to <code>/tasks</code> which does not exist; expected <code>/task-approval</code>)?		

3. Manage Accounts (`/accounts`) - Admin only

3.1 Navigation & List

#	Question	Yes	No
1	Were you able to navigate to the "Accounts" tab from the sidebar?		
2	Does the Activated Accounts list load with up to 10 entries per page?		
3	Can you toggle to "View Deactivated" to see deactivated accounts?		
4	Can you toggle back to "View Active"?		
5	Are columns shown for Name, Email, Role, Status, Created date, and Actions?		
6	Did pagination correctly trigger when the user list exceeds 10 entries (the 11th user moves to page 2)?		
7	Can you navigate between pages smoothly?		

3.2 Onboarding

#	Question	Yes	No
1	Could you click "Onboard Account" to open the new-user form?		
2	Are required fields enforced (Full Name, Gmail, Role)?		
3	Is the Role dropdown limited to <code>admin</code> , <code>manager</code> , <code>user</code> ?		
4	Does an invalid email format show an inline error?		
5	After successful onboarding, does a SweetAlert success toast appear?		
6	Does the new account immediately appear in the Activated Accounts list after onboarding?		

7	If you onboard a Gmail that previously existed (deactivated), does the system reactivate it instead of erroring?		
8	Does the new user receive a welcome email at the Gmail address provided (best-effort SES email)?		
9	Is a quota record created for the new user with <code>tier='free'</code> ?		
10	Is the onboarding action recorded in Admin Activity Logs?		

3.3 Search, Sort, Filter

#	Question	Yes	No
1	Were you able to search Activated Accounts by name?		
2	Were you able to search Activated Accounts by email?		
3	Were you able to search Deactivated Accounts by name and email?		
4	Could you sort accounts by Name, Email, Role, or Status by clicking the column headers?		
5	Does clicking the same column twice toggle ascending / descending order?		
6	Could you filter accounts by role (All / Admin / Manager / User) using the filter panel?		
7	Do search + sort + filter all work together correctly?		

3.4 Account Actions

#	Question	Yes	No
1	Were you able to deactivate an active account from the Actions column?		
2	Did a SweetAlert confirmation appear before deactivation?		
3	After deactivation, did the account move to the Deactivated Accounts list?		
4	Is the deactivated user prevented from logging in (<code>is_active=false</code> blocks the OAuth callback)?		
5	Were you able to reactivate a deactivated account from the Actions column?		
6	After reactivation, can the user log in normally?		

7	Could you click "Edit" on an account to open <code>/edit-account</code> with the user's data pre-filled?		
8	Could you successfully update full name and / or role on the Edit Account page?		
9	Does a name change in Accounts also update <code>fullname</code> on the user's quota record?		
10	Could you click "View Logs" on an account row to jump to that user's Admin Activity Logs (filtered by <code>target_email</code>)?		

4. Admin Activity Logs (`/admin-activity-logs`)

4.1 Log Viewing

#	Question	Yes	No
1	Does the Admin Activity Logs page display all admin-side activities (onboard, update, deactivate, restore, role change, <code>accept_terms</code>)?		
2	Are entries showing timestamp, performed-by (admin name + email), action, affected user, what changed, IP?		
3	Is the most recent activity displayed at the top?		
4	When you arrive from Accounts via "View Logs", are entries pre-filtered to that target user's email?		

4.2 Filtering & Search

#	Question	Yes	No
1	Can you filter logs by Action Type (onboard / update / deactivate / activate / <code>accept_terms</code>)?		
2	Can you filter logs by Time Range (e.g. last 7 days, last 30 days, all)?		
3	When you change a filter, does the result list refresh correctly?		
4	Do multiple filters work together correctly?		

4.3 Pagination

#	Question	Yes	No
1	Does pagination work correctly (10 entries per page)?		

2	Can you navigate between pages smoothly?		
3	Does the page counter display correctly (e.g. "Page 1 of 5")?		

5. Document Extraction / Knowledge Base Upload (/document-extraction)

5.1 File Upload

#	Question	Yes	No
1	Can you click "Browse Files" to select a PDF document?		
2	Does the system accept PDF files?		
3	Does the system reject non-PDF files with an appropriate error message?		
4	After selecting a file, are the file name and size displayed correctly?		
5	Can you clear the selected file and choose a different one?		
6	Can you click "Preview & Process" to proceed?		
7	If a file > size limit is uploaded, does the system show a clear error?		

5.2 PDF Preview

#	Question	Yes	No
1	Does the PDF preview render all pages correctly?		
2	Can you see page numbers on each page?		
3	Is the PDF displayed at a readable size?		
4	Does the layout accommodate multi-page PDFs without overlapping?		
5	Can you scroll through the PDF preview smoothly?		

5.3 PDF Parsing

#	Question	Yes	No
1	Can you click the "Parse PDF" button?		
2	Does the system show a loading / progress indicator during processing?		

3	After parsing, is the content displayed in chunks?		
4	Are chunks showing metadata (Page, Type, Section / Section Title)?		
5	Can you click on a chunk to highlight its location in the PDF preview?		
6	Are the highlight boxes drawn accurately on the PDF page?		
7	Does the PDF auto-scroll to the highlighted region when you click a chunk?		
8	Can you switch between Markdown and JSON views of the chunks?		
9	Are tables, lists, and headings preserved in the Markdown rendering?		
10	Are images / image-only chunks correctly identified with <code>type=image</code> ?		

5.4 Content Editing

#	Question	Yes	No
1	Can you click "Edit" on a chunk to open the rich-text editor?		
2	Can you modify text, formatting, or tables inside the editor?		
3	Can you save the edits, and do they persist on the chunk?		
4	Can you cancel edits without saving?		
5	Are edited chunks visually marked as modified?		
6	Are edits reflected in both Markdown and JSON views?		
7	Can you undo unwanted edits before saving?		

5.5 Knowledge Base Upload

#	Question	Yes	No
1	After parsing, does the "Upload to Knowledge Base" button appear?		
2	Can you click the button to upload chunks to the knowledge base?		
3	Does the system show a loading indicator during upload?		
4	If a duplicate document is detected (same content hash OR same filename), does a duplicate modal appear?		

5	Does the duplicate modal show the existing document's details (filename, upload date, uploaded by)?		
6	Does the duplicate modal show cost-savings information (chunks already embedded)?		
7	After a successful upload, does a success modal appear?		
8	Does the success modal show the chunk count and filename?		
9	Is a <code>KB_Logs</code> audit entry recorded for the upload?		
10	After a successful upload, can you immediately query the new content via the SFX Bot?		

5.6 Processing History

#	Question	Yes	No
1	Can you open the processing history modal?		
2	Does the history show all previously processed documents?		
3	Are document details (filename, upload date, chunks, file size, uploaded by) displayed correctly?		
4	Can you search documents by filename or by uploader?		
5	Can you sort documents by date, filename, chunk count, or file size?		
6	Can you toggle between ascending and descending sort order?		
7	Does pagination work correctly (10 entries per page)?		
8	Can you view the parsed content of a historical document?		
9	Can you delete a document from the knowledge base?		
10	Does a confirmation modal appear before deletion?		
11	After deletion, is the document removed from the history list?		
12	After deletion, are the document's chunks also removed from the vector store (queries no longer return it)?		
13	Is the document's S3 file (if any) also removed best-effort?		
14	Can you view a document's version history (re-uploads of the same file)?		

5.7 Upload New PDF

#	Question	Yes	No
1	Can you click "Upload New PDF" to process another document?		
2	Does the system reset the preview, parsed content, and edits?		
3	Can you select and process a new PDF file?		

6. KB Analytics (/kb-analytics)

#	Question	Yes	No
1	Does the KB Analytics page load successfully?		
2	Are stat cards visible for total documents, total sessions, total tokens, total cost?		
3	Is the Health Status panel visible (services up/down)?		
4	Can you toggle Document, Chat, Cost, and Activity Logs sections?		
5	Can you change the time range (e.g. 7 / 30 / 90 days) and see the data update?		
6	Are charts rendered correctly (bar / line) where applicable?		
7	Can you scroll through KB activity log entries?		

7. SFX Bot (/sfx-bot) - KB chat

7.1 Chat Interface

#	Question	Yes	No
1	Can you access the SFX bot page?		
2	Is the chat interface displayed with a message input box?		
3	Can you type a message in the input box?		
4	Can you send a message by clicking the send button or pressing Enter?		
5	Does your message appear in the chat history immediately?		
6	Does the bot show a "thinking" / typing-dots indicator while processing?		

7	Does the bot stream the response token-by-token (rather than waiting for the full reply)?		
8	Can you click "Stop" to cancel a streaming response mid-flight?		

7.2 AI Responses

#	Question	Yes	No
1	Does the bot respond to your query within a reasonable time (< 10 seconds for first token)?		
2	Are responses rendered as Markdown (lists, code blocks, tables, links)?		
3	Can you scroll through the chat history?		
4	Are user and bot messages visually distinct (different colors / alignments)?		
5	Are timestamps shown on messages?		

7.3 Document Context (RAG)

#	Question	Yes	No
1	Can you ask questions about previously uploaded documents?		
2	Does the bot retrieve relevant information from the knowledge base?		
3	Are source documents cited inline in the bot's responses (e.g. [Source: filename, Page X])?		
4	If you ask about something NOT in the KB, does the bot say so instead of hallucinating?		
5	If a query exceeds your monthly quota, does a Quota Exceeded modal appear?		
6	When the LLM service errors, does an LLM Error modal explain the failure (instead of silently breaking)?		

7.4 Chat Sessions

#	Question	Yes	No
1	Can you open the chat sessions / threads sidebar?		
2	Can you create a new chat session?		

3	Are previous sessions listed with their titles and last activity time?		
4	Can you switch between sessions and see each session's full history?		
5	Can you rename a session?		
6	Can you delete a session?		
7	Does the active session persist across page refreshes (sessionStorage)?		
8	On mobile / narrow screens, does the threads drawer toggle open / closed correctly?		

8. AI Assistant (`/ai-chat-new`) - Supervisor agent

8.1 Chat & Threads

#	Question	Yes	No
1	Can you access the AI Assistant page?		
2	Is the recents / threads sidebar visible with prior chats?		
3	Can you start a new chat?		
4	Can you rename or delete a thread?		
5	Does the active thread persist across page refreshes?		
6	Is the assistant connected via WebSocket (real-time streaming) when no file is attached?		
7	Does the assistant fall back to HTTP correctly if the WebSocket is unavailable?		

8.2 Clear Requests

#	Question	Yes	No
1	When you give a clear request (e.g. "Create a Google Doc titled 'Q3 Plan' with sections X, Y, Z"), does the assistant complete exactly what you asked?		
2	When you ask for a Google Calendar event ("Schedule meeting tomorrow at 9 AM, 30 min, with X@y.com"), is the event created with the correct date, time, duration, and attendees?		
3	When you ask to send a Gmail draft, is the recipient, subject, and body filled in correctly?		

4	When you ask for a multi-step task (e.g. "Create event then create doc and attach link"), does it execute the steps in the correct order?		
5	When you ask to create a Sheet with tabs / headers, does the new sheet have the expected structure?		
6	When you ask the assistant to organize a Drive folder, does it move the right files?		

8.3 Vague / Ambiguous Requests

#	Question	Yes	No
1	When you give a vague request, does the assistant ask the right clarifying question before acting?		
2	When the assistant returns multiple matches (e.g. "I found 3 emails from Kita - which one?"), can you reply with <code>1</code> , <code>2</code> , <code>the second one</code> , or by name to disambiguate?		
3	When you provide wrong or incomplete details, does the assistant detect the issue and guide you to fix it?		
4	When you ask a domain-specific question, is the answer accurate and relevant?		

8.4 Approvals (DANGEROUS / CRITICAL actions)

#	Question	Yes	No
1	When you ask for a high-impact action (send email, delete event, edit doc), does the assistant request confirmation in chat first?		
2	Does the approval prompt show the exact action it will take (recipient, subject, body, file ID, etc.) so you can review before approving?		
3	Can you approve by replying naturally (e.g. <code>yes</code> , <code>go ahead</code> , <code>confirm</code>)?		
4	Can you reject by replying naturally (e.g. <code>no</code> , <code>cancel</code> , <code>stop</code>)?		
5	After approval, does the workflow continue with any remaining steps automatically?		
6	After rejection, does the assistant cancel the pending action and stop the workflow cleanly?		
7	If you reload the page mid-approval, is the pending action still there when you return?		

8.5 File Uploads

#	Question	Yes	No
1	Can you click the paperclip icon and attach a file (PDF, DOCX, TXT, or image)?		
2	Does the attached-file chip appear in the composer?		
3	Can you remove the attached file via the X chip?		
4	Can you re-attach the same file again after removing it (no silent no-op)?		
5	When you send a message with a file, does the assistant successfully receive and reference the file content?		
6	If you upload a Word template + ask to merge data into it, does the assistant create a new doc with the data merged in?		
7	If you upload a PDF and say "find this template in my Drive instead", does the assistant correctly use the Drive file (not demand re-upload)?		

8.6 Streaming, Progress, Stop

#	Question	Yes	No
1	While the assistant works on a multi-step plan, is a progress panel visible showing each step's status?		
2	Are step states (in-progress / done / skipped / failed) shown clearly?		
3	Can you click to expand the progress panel for full details?		
4	Does the assistant's text response stream token-by-token?		
5	Can you click "Stop" to cancel mid-flight, and does it append a "Stopped by user" notice?		
6	If a tool fails (e.g. Calendar conflict), does the assistant explain the problem clearly and suggest a useful next step?		

8.7 Memory & Continuity

#	Question	Yes	No
1	When you continue the conversation, does the assistant correctly remember earlier context (e.g. "the doc you just created")?		
2	When you change your instruction mid-conversation, does it adapt without losing the new intent?		

3	When you ask the same question in different wording, does it give consistent results?		
4	When you scroll the thread, is older history retained correctly?		

8.8 Limits, Errors, Edge Cases

#	Question	Yes	No
1	When you ask for something the assistant cannot do (e.g. "send a fax"), does it clearly state the limitation without hallucinating?		
2	When you exceed your monthly token quota, does a Quota Exceeded modal appear with a clear message?		
3	When the LLM provider errors, does an LLM Error modal explain the failure?		
4	When you test edge cases (very long messages, special characters, empty input), does the assistant remain stable?		
5	When you ask for output formatting (e.g. "as a table" or "JSON only"), does it follow the requested format correctly?		
6	When you ask for a summary of long content, does it keep key facts and avoid omissions?		
7	When you ask a security-sensitive question, does it avoid exposing private or confidential data of other users?		

8.9 Per-thread Token Usage

#	Question	Yes	No
1	Can you click "Token Usage" in the thread header to open the per-thread usage modal?		
2	Does the modal show input tokens, output tokens, total tokens, and estimated cost for that thread?		
3	Are per-step / per-LLM-call breakdowns visible?		
4	Does the modal correctly cover both supervisor LLM calls AND sub-agent LLM calls (where applicable)?		

9. Logs & Analytics (/logs) - Admin Dashboard

9.1 Performance Tab (Agent metrics)

#	Question	Yes	No
1	Does the Performance tab load with system-wide metrics (avg response time, total requests)?		
2	Are per-agent cards rendered (gmail / drive / docs / sheets / calendar / mapping)?		
3	Are conversational + supervisor LLM cards visible?		
4	Are KB document and chat analytics cards rendered?		
5	Are AI Assistant Analytics tier-usage breakdowns visible?		
6	Can you change the time range and see metrics refresh?		

9.2 Token & Cost Tab

#	Question	Yes	No
1	Is the Token & Cost tab visible to admins?		
2	Is the per-model pricing table rendered (input / cached_input / output USD per 1K tokens)?		
3	Can you search the pricing table by model name?		
4	Does pagination work in the pricing table?		
5	Can you edit the rate for a model and save successfully?		
6	Is the change reflected in subsequent cost calculations on <code>/quota/report</code> ?		

9.3 Request Logs

#	Question	Yes	No
1	Can you view logs of LLM calls / agent calls with timestamp, user, agent, tool, success / failure, duration?		
2	Can you filter logs by user, request_id, or agent?		
3	Can you drill into a request_id to see all sub-calls in chronological order?		

10. Token Quota Admin (`/quota`)

10.1 Budget & Alerts

#	Question	Yes	No
1	Is the Budget section visible at the top of the page?		
2	Can you view and update the platform-wide monthly budget?		
3	Are budget warnings triggered when usage approaches the budget?		

10.2 User Quota Table

#	Question	Yes	No
1	Does the user quota table list all users with current usage / monthly limit / tier / cost / reset date?		
2	Can you filter users by tier (free / pro / enterprise / unlimited / inactive)?		
3	Can you search by user name or email?		
4	Can you edit a user's tier and have the monthly_limit auto-update?		
5	Can you override a user's monthly_limit manually?		
6	Can you edit a user's reset_date?		
7	Can you reset a user's <code>current_usage</code> and <code>current_cost_usd</code> to zero (manual reset)?		
8	Does a manual reset write a <code>UsageLogs</code> row with <code>operation=admin_reset</code> for audit?		
9	Can you deactivate a user from the quota page?		
10	Can you restore a deactivated user from the quota page?		

10.3 Top Users & Breakdown

#	Question	Yes	No
1	Is a "Top Users" panel rendered showing the highest token consumers in the selected window?		
2	Can you change the window (last 24h / 7d / 30d) and see the list refresh?		
3	Can you click a user to see their per-service usage breakdown (chat / agent / kb / embedding / document)?		

4	Are model-used and operation lists shown in the breakdown?		
---	--	--	--

10.4 Admin Actions Audit

#	Question	Yes	No
1	Is the "Admin Actions" audit panel visible at the bottom?		
2	Are entries shown with admin name, action (create / update / reset / deactivate / restore), target user, timestamp?		
3	Can you paginate through admin actions?		
4	Can you filter by admin email?		

11. Profile (/profile)

#	Question	Yes	No
1	Does the profile page show your full name, @username, email, role badge, member-since date, and Google avatar?		
2	Is the Token Consumption Panel visible?		
3	Does it show your current period's usage / limit / cost / tier?		
4	Can you change the time range and "Include resets" toggle?		
5	Is per-day / per-service usage shown (chart + table)?		
6	Are SFX Bot chat turns clustered correctly (one row per conversation, not per LLM call)?		
7	Does pagination of the activity table work?		
8	Is the monthly history bar chart rendered?		

12. Cross-cutting / Non-functional

#	Question	Yes	No
1	When you switch pages and come back, is the previous page state preserved (KeepAlive)?		

2	Are global JavaScript errors caught and shown in an Error Modal (instead of crashing the app)?		
3	Are SweetAlert2 confirmations themed consistently with the app?		
4	Does the app behave correctly on a narrow screen (< 1024px) - sidebar collapses, drawers toggle?		
5	Do all <code>Authorization: Bearer <jwt></code> API calls work correctly (no 401 loops on token expiry)?		
6	When you review logs or traces, is there enough detail to audit what happened (request_id, thread_id, user_id, model, tokens, cost)?		
7	After all admin testing, would you trust the assistant + KB + quota system to support real operations?		

MANAGER

A Manager has access to the Dashboard, AI Assistant, SFX Bot, Document Extraction (per current routing), Analysis Reports, Dynamic Mapping, and Profile. Managers do NOT have access to Accounts, Admin Activity Logs, Logs & Analytics, KB Analytics, Token Quota Admin, or Edit Account.

1. Login & Authentication (Manager)

1.1 Google Sign-In

#	Question	Yes	No
1	Can you successfully log in using your Google account?		
2	Does the system redirect you to the Google OAuth consent screen on first sign-in?		
3	Are all required Google scopes (Gmail / Drive / Docs / Sheets / Calendar) requested?		
4	After successful login, are you redirected to the dashboard (<code>/dashboard</code>)?		
5	Is your profile information (name, email, picture) displayed correctly in the sidebar?		
6	Is your role badge (<code>manager</code>) shown on your profile page?		
7	Does the system remember your session across page refreshes?		

1.2 Terms of Service

#	Question	Yes	No
1	If you have not yet accepted Terms, does a fullscreen modal block the rest of the app?		
2	Is "Accept & Continue" disabled until you scroll to the bottom?		
3	Can you accept and continue into the application?		
4	Can you decline and be signed out?		

1.3 Logout

#	Question	Yes	No
1	Can you successfully log out using the sidebar logout button?		
2	After logging out, are you redirected back to the login page?		
3	Does the system prevent access to protected pages when not logged in?		
4	If you try to navigate by URL to an admin-only page (e.g. <code>/accounts</code>), are you correctly redirected to <code>/dashboard</code> ?		

2. Sidebar & Navigation

#	Question	Yes	No
1	Are exactly the manager-allowed nav items visible (Dashboard, AI Assistant, SFX Bot, Dynamic Mapping, Analysis Report)?		
2	Are admin-only items hidden (Accounts, KB Analytics, Logs & Analytics, Token Management)?		
3	Can you click your profile block in the sidebar to navigate to <code>/profile</code> ?		
4	Does the QuotaWidget at the top of the sidebar show your current monthly usage / limit?		

3. Dashboard

#	Question	Yes	No
1	Does the Dashboard load successfully?		

2	Is the welcome card visible with your name and last-login time?		
3	Are the quick-action cards (Document Extraction, Token Management, Task Approval) visible?		
4	When you click Document Extraction, are you routed to <code>/document-extraction</code> ?		
5	When you click Token Management, what happens (note: Token Management is admin-only and may redirect or show "not allowed")?		

4. AI Assistant (`/ai-chat-new`) - Supervisor agent

4.1 Chat & Threads

#	Question	Yes	No
1	Can you access the AI Assistant page?		
2	Is the recents / threads sidebar visible with your prior chats?		
3	Can you start a new chat?		
4	Can you rename or delete a thread?		
5	Does the active thread persist across page refreshes?		

4.2 Clear Requests

#	Question	Yes	No
1	When you give a clear request, does the assistant complete exactly what you asked?		
2	When you ask for a Calendar event with date / time / attendees, is it created correctly?		
3	When you ask to draft or send a Gmail email, is recipient / subject / body correct?		
4	When you ask for a Google Doc with sections X, Y, Z, is the doc created with those headings?		
5	When you ask for a multi-step task, does it execute the steps in the correct order?		
6	When you ask to read a sheet by URL, does it correctly extract the sheet ID and read the data?		

4.3 Vague & Disambiguation

#	Question	Yes	No
1	When you give a vague request, does the assistant ask the right clarifying question before acting?		
2	When the assistant returns multiple matches, can you reply naturally (1, the second one, by name) to disambiguate?		
3	When you provide wrong / incomplete details, does the assistant detect the issue and guide you to fix it?		

4.4 Approvals (DANGEROUS / CRITICAL actions)

#	Question	Yes	No
1	When you ask the assistant to do a high-impact action (send email, delete event, edit doc), does it request confirmation in chat first?		
2	Does the approval prompt show the exact action it will take so you can review before approving?		
3	Can you approve naturally (yes, confirm, go ahead)?		
4	Can you reject naturally (no, cancel, stop)?		
5	After approval, does the workflow continue with any remaining steps automatically?		
6	After rejection, is the pending action cleared and the workflow stopped cleanly?		
7	If you reload the page mid-approval, is the pending action still there when you return?		

4.5 File Uploads

#	Question	Yes	No
1	Can you click the paperclip and attach a file (PDF / DOCX / TXT / image)?		
2	Does the attached-file chip appear in the composer?		
3	Can you remove the file and re-attach the same file again (no silent no-op)?		
4	Does the assistant successfully receive the file content?		
5	Template + data merge: if you upload a Word template and ask to merge with a Drive data file, does the assistant produce the merged doc?		

4.6 Streaming, Progress, Stop

#	Question	Yes	No
1	Is a step-by-step progress panel visible while the assistant works?		
2	Does the assistant's text response stream token-by-token?		
3	Can you click Stop to cancel mid-flight?		
4	If a tool fails, does the assistant explain the problem clearly and suggest a useful next step?		

4.7 Memory & Continuity

#	Question	Yes	No
1	When you continue the conversation, does the assistant correctly remember earlier context (e.g. "the doc you just created")?		
2	When you change your instruction mid-conversation, does it adapt without losing the new intent?		
3	When you ask the same question in different wording, does it give consistent results?		

4.8 Limits, Errors, Edge Cases

#	Question	Yes	No
1	When you ask for something the assistant cannot do, does it clearly state the limitation without hallucinating?		
2	When you exceed your monthly token quota, does a Quota Exceeded modal appear?		
3	When the LLM provider errors, does an LLM Error modal explain the failure?		
4	When the request is time-sensitive, is the response speed acceptable for real usage?		
5	When you test edge cases (very long messages, special characters), does the assistant remain stable?		
6	When you ask a security-sensitive question, does it avoid exposing private or confidential data of other users?		

4.9 Per-thread Token Usage

#	Question	Yes	No
---	----------	-----	----

1	Can you click "Token Usage" in the thread header to see per-thread tokens / cost?		
2	Does the modal show breakdowns by step / LLM call?		

5. SFX Bot (`/sfx-bot`) - KB chat

5.1 Chat Interface

#	Question	Yes	No
1	Can you access the SFX bot page?		
2	Is the chat interface displayed with a message input box?		
3	Can you type and send a message (button or Enter)?		
4	Does the bot show a thinking indicator while processing?		
5	Does the response stream token-by-token?		
6	Can you click Stop to cancel a streaming response?		

5.2 AI Responses

#	Question	Yes	No
1	Does the bot respond within a reasonable time (< 10 seconds for first token)?		
2	Are responses rendered as Markdown (lists, code blocks, tables, links)?		
3	Can you scroll through the chat history?		
4	Are user and bot messages visually distinct?		

5.3 Document Context (RAG)

#	Question	Yes	No
1	Can you ask questions about uploaded documents?		
2	Does the bot retrieve relevant information from the knowledge base?		
3	Are source documents cited in the bot's responses?		

4	If you ask about something NOT in the KB, does the bot say so instead of hallucinating?		
5	If a query exceeds your monthly quota, does a Quota Exceeded modal appear?		

5.4 Chat Sessions

#	Question	Yes	No
1	Can you create a new chat session?		
2	Are previous sessions listed in the threads sidebar?		
3	Can you switch between sessions and see each session's full history?		
4	Can you rename a session?		
5	Can you delete a session?		
6	Does the active session persist across page refreshes?		

6. Document Extraction (/document-extraction) - per current routing

Note: routing currently allows manager access. Confirm with admin whether this is intended for your deployment; the sidebar may hide the link.

#	Question	Yes	No
1	Can you reach the Document Extraction page (URL or sidebar)?		
2	Can you upload a PDF and parse it?		
3	Are chunks displayed with metadata (page, type, section)?		
4	Can you click a chunk to highlight its location in the PDF?		
5	Can you switch between Markdown and JSON views?		
6	Can you edit chunk content with the rich-text editor?		
7	Can you upload chunks to the Knowledge Base?		
8	If a duplicate is detected, does the duplicate modal appear?		
9	Can you open Processing History and view / delete documents you've uploaded?		

10	Can you view version history for a re-uploaded file?		
----	--	--	--

7. Dynamic Mapping (/dynamic-mapping)

#	Question	Yes	No
1	Can you reach the Dynamic Mapping page?		
2	Can you upload a source spreadsheet / CSV and a target template?		
3	Does the AI mapping engine suggest column mappings?		
4	Can you edit / approve / reject mappings?		
5	Can you save a mapping template for reuse?		
6	Can you load a previously saved mapping template?		
7	Can you transform the data with the saved mapping?		
8	Can you preview the transformed data before applying?		

8. Analysis Reports

8.1 Analysis Report Hub (/analysis-report)

#	Question	Yes	No
1	Does the Analysis Report hub render with cards for ABC, One-Page, Workload?		
2	Can you click each card and reach the corresponding sub-page without errors?		

8.2 ABC Analysis (/analysis-abc)

#	Question	Yes	No
1	Can you upload / select data for ABC analysis?		
2	Does the analysis run and produce A/B/C category breakdowns?		
3	Can you view ABC Analysis History (/analysis-abc-history)?		
4	Can you re-open a previous ABC analysis result?		

8.3 One-Page Report (/analysis-one-page)

#	Question	Yes	No
1	Can you generate a one-page report?		
2	Are key metrics summarized clearly?		

8.4 OPR History (/opr-history)

#	Question	Yes	No
1	Can you view your operational PR history?		
2	Can you re-open a past OPR record?		

8.5 Workload Analysis (/analysis-workload)

#	Question	Yes	No
1	Can you generate a workload analysis?		
2	Are workload distributions / charts rendered correctly?		

9. Profile

#	Question	Yes	No
1	Does the profile page show your name, @username, email, role badge (<i>manager</i>), and avatar?		
2	Is your Token Consumption Panel visible with current usage / limit / cost / tier?		
3	Can you change the time range and toggle "Include resets"?		
4	Is per-day / per-service usage shown?		
5	Are SFX Bot chat turns clustered correctly (one row per conversation)?		
6	Is the monthly history bar chart rendered?		

10. Quota & Limits

#	Question	Yes	No
1	Is the QuotaWidget in the sidebar showing your real current usage (not 0 / placeholder)?		
2	When you approach 80% of your monthly limit, does a warning indicator appear?		
3	When you exceed your monthly limit, are AI Assistant + SFX Bot requests blocked with a clear message?		
4	Does usage roll over correctly into the new month (auto-reset on <code>reset_date</code>)?		

11. Cross-cutting / Non-functional (Manager)

#	Question	Yes	No
1	When you switch pages and come back, is the previous page state preserved?		
2	Are global errors caught and shown in an Error Modal (instead of crashing the app)?		
3	Does the app behave correctly on a narrow screen (< 1024px)?		
4	When you reload the page, are you still logged in?		
5	When the access token expires (~60 min), does the app silently refresh without forcing re-login?		
6	When different managers test, is behavior consistent (i.e. each sees only their own threads / sessions / activity)?		
7	After testing, would you trust this assistant to support your day-to-day operations?		

USER

A standard User has access to SFX Bot (their primary landing page), Dynamic Mapping, Analysis Reports, and Profile. Users do NOT have access to Dashboard, Accounts, AI Assistant, Document Extraction (Manage KB), Admin Activity Logs, KB Analytics, Logs & Analytics, or Token Quota Admin.

1. Login & Authentication (User)

1.1 Google Sign-In

#	Question	Yes	No
1	Can you successfully log in using your Google account?		
2	Does the system redirect you to the Google OAuth consent screen on first sign-in?		
3	Are all required Google scopes requested (Gmail / Drive / Docs / Sheets / Calendar)?		
4	After successful login, are you redirected to your default landing page (<code>/sfx-bot</code>)?		
5	Is your profile information (name, email, picture) displayed correctly in the sidebar?		
6	Is your role badge (<code>user</code>) shown on your profile page?		
7	Does the system remember your session across page refreshes?		

1.2 Terms of Service

#	Question	Yes	No
1	If you have not yet accepted Terms, does a fullscreen modal block the rest of the app?		
2	Is the Accept button disabled until you scroll to the bottom of the Terms?		
3	Can you accept and continue into the application?		
4	Can you decline and be signed out?		

1.3 Logout & Access Control

#	Question	Yes	No
1	Can you successfully log out using the sidebar logout button?		
2	After logging out, are you redirected back to the login page?		
3	Does the system prevent access to protected pages when not logged in?		
4	If you try to navigate by URL to an admin-only page (e.g. <code>/accounts</code> , <code>/quota</code> , <code>/logs</code>), are you correctly redirected to <code>/sfx-bot</code> ?		
5	If you try to navigate to <code>/dashboard</code> (manager+admin only), are you correctly redirected to <code>/sfx-bot</code> ?		
6	If you try to navigate to <code>/ai-chat-new</code> (admin+manager only), are you correctly redirected?		

2. Sidebar & Navigation

#	Question	Yes	No
1	Are exactly the user-allowed nav items visible (SFX Bot, Dynamic Mapping, Analysis Report)?		
2	Are admin / manager-only items hidden (Dashboard, Accounts, AI Assistant, Manage KB, KB Analytics, Logs & Analytics, Token Management)?		
3	Can you click your profile block in the sidebar to navigate to <code>/profile</code> ?		
4	Does the QuotaWidget at the top of the sidebar show your current monthly usage / limit?		

3. SFX Bot (`/sfx-bot`) - your primary tool

3.1 Chat Interface

#	Question	Yes	No
1	Can you access the SFX bot page?		
2	Is the chat interface displayed with a message input box?		
3	Can you type a message in the input box?		
4	Can you send a message by clicking the send button or pressing Enter?		
5	Does your message appear in the chat history immediately?		
6	Does the bot show a thinking / typing indicator while processing?		
7	Does the bot stream the response token-by-token?		
8	Can you click Stop to cancel a streaming response mid-flight?		

3.2 AI Responses

#	Question	Yes	No
1	Does the bot respond to your query within a reasonable time (< 10 seconds for first token)?		
2	Are responses rendered as Markdown (lists, code blocks, tables, links)?		

3	Can you scroll through the chat history?		
4	Are user and bot messages visually distinct (different colors / alignments)?		
5	Does the welcome screen show useful suggested prompts before you start chatting?		
6	Can you click a suggested prompt to send it as a message?		

3.3 Document Context (RAG)

#	Question	Yes	No
1	Can you ask questions about uploaded documents (HR policies, SOPs, manuals)?		
2	Does the bot retrieve relevant information from the knowledge base?		
3	Are source documents cited in the bot's responses (filename, page)?		
4	If you ask about something NOT in the KB, does the bot say so instead of hallucinating?		
5	If a query exceeds your monthly quota, does a Quota Exceeded modal appear with a clear message?		
6	When the LLM service errors, does an LLM Error modal explain the failure?		

3.4 Chat Sessions

#	Question	Yes	No
1	Can you open the chat sessions / threads sidebar?		
2	Can you create a new chat session?		
3	Are previous sessions listed with their titles and last activity time?		
4	Can you switch between sessions and see each session's full history?		
5	Can you rename a session?		
6	Can you delete a session?		
7	Does the active session persist across page refreshes?		
8	On mobile / narrow screens, does the threads drawer toggle open / closed correctly?		

3.5 Privacy

#	Question	Yes	No
1	Can you ONLY see your own chat sessions (not other users')?		
2	When you ask the bot for confidential information about other users, does it refuse / not expose private data?		

4. Dynamic Mapping (/dynamic-mapping)

#	Question	Yes	No
1	Can you reach the Dynamic Mapping page from the sidebar?		
2	Can you upload a source data file (spreadsheet / CSV)?		
3	Can you upload / select a target template?		
4	Does the system suggest AI-driven column mappings?		
5	Can you edit / approve / reject mappings?		
6	Can you save a mapping template for reuse with your name / description?		
7	Can you load a previously saved mapping template?		
8	Can you transform the data with the mapping applied?		
9	Can you preview the transformed output before exporting?		
10	Can you only see / load mapping templates that you (or your team, per business rules) saved?		

5. Analysis Reports

5.1 Hub (/analysis-report)

#	Question	Yes	No
1	Does the Analysis Report hub render with cards (ABC, One-Page, Workload)?		
2	Can you click each card and reach the corresponding sub-page without errors?		

5.2 ABC Analysis (/analysis-abc, /analysis-abc-history)

#	Question	Yes	No
1	Can you upload / select data for ABC analysis?		
2	Does the analysis run and produce A / B / C category breakdowns?		
3	Are charts / tables rendered correctly?		
4	Can you view ABC Analysis History?		
5	Can you re-open a previous ABC analysis result?		

5.3 One-Page Report (/analysis-one-page)

#	Question	Yes	No
1	Can you generate a one-page report from your data?		
2	Are key metrics summarized clearly?		

5.4 OPR History (/opr-history)

#	Question	Yes	No
1	Can you view your operational PR history?		
2	Can you re-open a past OPR record?		

5.5 Workload Analysis (/analysis-workload)

#	Question	Yes	No
1	Can you generate a workload analysis?		
2	Are workload distributions / charts rendered correctly?		

6. Profile (/profile)

#	Question	Yes	No
1	Does the profile page show your name, @username, email, role badge (<code>user</code>), and avatar?		

2	Is your Token Consumption Panel visible?		
3	Does it show your current period's usage / limit / cost / tier?		
4	Can you change the time range and toggle "Include resets"?		
5	Is per-day / per-service usage shown (chart + table)?		
6	Are SFX Bot chat turns clustered correctly (one row per conversation, not per LLM call)?		
7	Does pagination of the activity table work?		
8	Is the monthly history bar chart rendered?		
9	Can you ONLY see your own usage data (not other users')?		

7. Quota & Limits (User-side)

#	Question	Yes	No
1	Is the QuotaWidget in the sidebar showing your real current usage (not a placeholder)?		
2	When you approach 80% of your monthly limit, is a warning indicator visible?		
3	When you exceed your monthly limit, are SFX Bot queries blocked with a clear message (Quota Exceeded modal)?		
4	Does usage roll over correctly into the new month (auto-reset on your <code>reset_date</code>)?		
5	After a manual admin reset, does your usage return to zero on the Profile page and SFX Bot work again?		

8. Cross-cutting / Non-functional (User)

#	Question	Yes	No
1	When you switch pages and come back, is the previous page state preserved (e.g. SFX Bot conversation)?		
2	Are global errors caught and shown in an Error Modal (instead of crashing the app)?		
3	Does the app behave correctly on a narrow screen / mobile (< 1024px)?		

4	When you reload the page, are you still logged in?		
5	When your access token expires (~60 min), does the app silently refresh without forcing re-login?		
6	When the request is time-sensitive, is response speed acceptable for real usage?		
7	When you ask the same question in different wording, do you get consistent answers?		
8	When you ask for output formatting (e.g. "as a list" or "in a table"), does the bot follow the format?		
9	When you ask for a summary of a long document, does it keep key facts and avoid omissions?		
10	When different users test, is behavior consistent with role / permission rules (you cannot do admin / manager actions)?		
11	After testing, would you trust the SFX Bot + Analysis tools to support your daily work?
